

Shades of Spring

Welcome spring with the colourful
jewels@bee collection

THIS SPRING, JEWELS@BEE INTRODUCES its latest collection of candy-coloured enamel rings and new additions to its versatile interchangeable earrings.

PERFECT BLOOMS

Blooming flowers herald the arrival of spring. Celebrate with jewels@bee's extensive range of enamel rings. The new

enamel shank rings come in delectable candy colours of juicy orange, cherry red, apple green and bubblegum pink as well as classic black and white and lavender. Each ring has a single perfect bloom — made of white sapphire petals with a diamond centre. Choose from white, yellow or rose gold settings. Wear these enamel rings singly or stack two different colours together for dramatic effect.

ALL THAT GLITTERS

Diamonds are a girl's best friend and jewels@bee best-selling signature staples are classic white gold diamond hoops that can be worn with — or without — interchangeable coloured gemstone drops. On their own, the diamond hoops are classic enough for work or weekends. Or, you can accent your personal style — by pairing the diamond hoops with semi-precious stones such as aquamarine, amethyst, sapphire, pink tourmaline, citrine, topaz and peridot.

Like these earrings, the best thing about jewels@bee fine jewellery pieces is how they are thoughtfully handcrafted with ingenuity and versatility — to be worn as a single statement piece or mixed and matched for added impact.
