

## FLOWER POWER

Jewels@bee's latest collection of floral-inspired pieces brings on the charm

JEWELS@BEE

PRETTY FLORALS IN elegant jewel tones are the highlights of Jewels@bee's latest jewellery collection. These delicate enamel flowers are crafted to adorn the brand's signature diamond hoops, which remain a favourite among its discerning clientele.

The petals are painted by hand and set in yellow gold with six full-cut diamonds nestling the centre. Jewels@bee's skilled jewellers used enamel painting techniques to bring out the rich tones of fresh orange, citrine, yellow, emerald green, cerulean blue, quartz pink

and royal purple in these finely crafted jewellery pieces.

Pair these flowers with signature diamond hoops, which now come in new sizes: Medium oval, which flatters any face shape, and the dramatic large hoop, which instantly glam ups any outfit.

There is also a figure eight shape for those who feel the need to wear something for good luck. Jewels@bee's

jewellery pieces, which showcase its diverse collection of diamonds, high quality coloured gems and semi-precious stones, are designed for the fashion savvy woman who values hand-crafted, statement pieces that never fail to dazzle. Brand director Ann Ang says, "We know most of our customers love the classic small hoops, which they wear every day. Yet others have fallen for the largest hoops, which look good day and night."
